

EQW Policy - Environment, Quality and Working Environment

Älmhults Gjuteri AB's objective is to maintain such a high environmental and quality level so that it is the main reason for purchasing our castings. At the same time we are striving to contribute to a satisfactory working environment and a positive, long-term and sustainable society development.

In order to fulfil its objectives, Älmhults Gjuteri AB has to:

- Consider environmental, quality and working environment ordinances to be the lowest requirement level.
- Make sure that our castings meet the customer's expectations and requirements.
- Make efforts to improve the resource management and reduce the company's environmental impact.
- Reduce our energy consumption and work to minimize CO₂ emissions from our operations, including using renewable electricity
- Make efforts together with our customers to reduce the climate impact of our castings in the use phase
- Use measurable environmental, quality and working environment objectives.
- Promote a culture of constant improvement in our business activities.
- Set both long-term and short-term goals as well as an action plan which is regularly followed up and renewed.
- Prevent ill-health and accidents as much as possible, and achieve a satisfactory working environment.

The work done by **Älmhults gjuteri AB's** employees has a direct or indirect influence on the objectives we have set.
